Què és una clau primària?
Camp que serveix per identificar cada registre d'una taula. No es pot repetir ni quedar buit.

Què és una clau forana?
Camp que apunta a la clau primària d'una altra taula. Serveix per connectar les taules.

Per què cal la taula enrollments?
Perquè un estudiant pot estar en moltes assignatures i una assignatura pot tenir molts estudiants. Aquesta taula del mig guarda cada matrícula, amb la data i la nota, i així tot queda ben organitzat.
